

PARTNER WITH US

When you partner with Generation Schools Network, you'll help strengthen an organization working to even the educational playing field for all students.

OUR VALUES

An organization that values the opportunity to collaboratively partner with like-minded people, corporations, community organizations, foundations, and government entities to achieve our collective objectives. Based in Colorado, we have over 15 years of experience supporting teachers, and with our facilitation of a 78 rural school district network, the Colorado Rural Education Collaborative, we have deep connections with school administrators and teachers across the state.

GSN staff meeting

Students learn from a local employer about summer job opportunities!

Every partnership opportunity we approach is unique. We believe the key to any successful relationship involves identifying each other's assets, abilities and goals, and seeing where areas overlap and what opportunities arise.

In some cases, this equates to a direct financial contribution in support of Generation Schools Network's programs in schools, and other times, it doesn't involve monetary resources of any kind. We welcome the opportunity to have conversations about what we can accomplish together to ensure all students have what they need to thrive.

WAYS TO GET INVOLVED

- Support one of our existing GSN programs in the areas of College & Career Readiness, Health & Wellness, Leadership & Improvement, and School Redesign and Innovation
- Be our point of reference for your organization and an internal spokesperson for GSN
- Leverage your expertise with our in-kind volunteer and program opportunities
- Donate unused technology materials or supplies to schools
- Share GSN information on your website and we can cross promote offerings on ours
- Host workplace visits, student internships or job-shadowing sessions for students
- Provide a problem-based scenario in partnership with a classroom
- Contribute board members to serve for a two-year term
- Align your employees to serve as volunteers for GSN programs

There are many benefits of getting involved with **Generation Schools Network**, specifically, creating a more prepared workforce, supporting local community growth, and building engagement and **encouraging skill development** with your employees. Coming alongside and supporting GSN also contributes to an **improved community image** and presence for your organization, which is a story we are happy to help share. We also want to learn more about **your community priorities** and help build a relationship to strengthen those goals.
